Space & Naval Warfare Systems Command Awards Contract

SAN DIEGO -- SEMCOR, Inc. of Mount Laurel, NJ is being awarded an Indefinite Delivery, Indefinite Quantity Task Order contract with a base year minimum ordering quantity of \$5,000 and a maximum order limitation of \$18,477,583. SEMCOR will provide technical engineering services for Information Support Systems, Command/Control Communications Systems and Implementation Class Desks to support PMW 152, PMW 176 and SPAWAR 05F. Work under this contract will include engineering and technical assistance in the conduct of requirements definition, shore system/subsystem engineering, designing, integration, testing, and evaluation; procurement and installation of selected systems, planning, managing and logistics support for system implementation; planning and execution of developmental, operational, and acceptance tests; life cycle support planning for the Department of the Navy Defense Message System (DMS), Base Level Information Infrastructure (BLII) and Joint Maritime Communications Systems (JMCOMS); and other technical and engineering services required to install an integrated Command, Control, Communications, Computers and Intelligence (C⁴I) suite into new construction ships and to update and modernize ships of the active fleet. The contract estimates 222,560 staff-hours for the firm period and for each of four option periods. If exercised, these options increase the contract's maximum order limitation to \$98,100,000. The work will be performed mainly in San Diego, Calif. and is expected to be completed in August 2002. Some contract funds may expire at the end of the current fiscal year. This contract was competitively procured (RFP N00039-97-R-0056(Q)) with three offers received and two awards made. The Space and Naval Warfare Systems Command, San Diego, Calif., is the contracting activity (N00039-97-D-0097).
